

PRODUCT RANGE

MARIS OMEGA-3 FISH OILS

No. 1.0, 29.04.2015

Premium Quality, Naturally: Maris Omega-3 Fish Oils

We offer a wide range of premium quality, natural triglyceride omega-3 fish oils, produced from freshest raw materials, purified at state-of-the-art facilities. For most products we have available different qualities, including grades that are non-winterized, flavored or fortified with vitamins and other natural nutrients.

Full Traceability

Quality doesn't start at the refining plant but at the fish source. We know where our oils are coming from and for most of our products can trace back to the fish processing plant, fishing vessel or farm.

Best Taste, Lowest Oxidation Level

Our ultra-low oxidized ingredients for novel foods and supplements impress with outstanding organoleptics: 100 % neutral in taste and smell, they provide ultimate stability and shelf life without fishy off-notes.

Strict Contaminant Control

Due to highly efficient refining technologies, Maris Omega-3 ingredients meet even the strictest regulations for environmental contaminants.

Documented Sustainability

Where available, we offer oils from fisheries that are certified sustainable by NGOs like the Marine Stewardship Council (MSC).
