

MarisOmega-3 liquids

Targeted product
concepts for your
brand.

Meeting consumer demand for plant-based alternatives

Today's consumers are looking for sustainable products from plant-based sources.

Our vegan omega-3 products **are made from microalgal and vegetable oils rich in DHA, SDA and ALA**. All products are 100% Non-GM, meeting Germany's „Ohne Gentechnik“ label requirements.

EU health claims:

- brain function
- eye function
- heart function
- infant brain and eye development during pregnancy and breastfeeding

Natural DHA for those who need it most

When breastfeeding is phased out, an infant's DHA level drops dramatically. DHA supplementation for babies and toddlers is **crucial for adequate development of the nervous system**.

Our baby formula contains our premium DHA fish oil – as used by leading infant formula brands. **DHA is in the sn-2 position**, just like in mother's milk, for high bioavailability.

EU health claims:

- brain development
- eye development

Prevention of preterm birth with high dose DHA

Latest research has shown impressive reductions in pre-term births after DHA supplementation with 1,000 mg per day during pregnancy.

A recent Cochrane Review confirmed a **42% risk reduction of early preterm births** among mothers with sufficient DHA intakes.

Our Prenatal DHA provides **five times more DHA than conventional products**. Available with added vitamins.

EU health claims:

- infant brain and eye development during pregnancy and breastfeeding

Premium EPA/DHA/DPA fish oil from sustainable sources

Naturally sustainable from fish to bottle: For Omega-3 Complete we only source fresh **raw materials from certified sustainable fisheries**. 100% traceability is guaranteed.

Best taste means highest purity: Thanks to our special manufacturing process, Omega-3 Complete is free from the undesirable by-products of oxidation and is therefore particularly pure – with no artificial additives. Available with added vitamins and other functional nutrients.

EU health claims:

- brain function
- eye function
- heart function

Optimal omega-3 intake in a fish-free formula

As many children won't eat fish, **omega-3 deficiency is widespread**. Our Kids Vegan formula, flavoured with mild natural citrus extract, offers an alternative. It is **served by the spoon or can be added to almost any food**.

All-natural formula: 100% Non-GM, no synthetic additives or preservatives.

EU health claims:

- > brain function
- > eye function

5 reasons to choose MarisOmega-3 liquids

Great taste:

100% free from fishy off-notes

Sustainable oil sources:

fish from certified catch, Non-GM microalgae

Natural formulas:

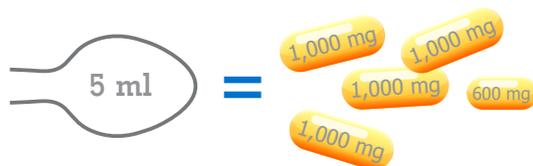

no artificial colours, flavours or stabilisers

Convenient format:

no need to swallow large capsules

High load per serving:

one teaspoon = 4.6 standard fish oil capsules
